

Outpatient Parenteral Antibiotic Treatment (OPAT)

Physician Lead: *Dr. Ngan Lyle*

Goals

- Engage Infectious Diseases physicians to work with administration to develop an operational plan for an outpatient parenteral antibiotic service
- Conduct an environmental scan to learn from other sites offering this service

Budget approved: \$5,000

Outcomes

- Enhanced patient-centred care
- Improved patient flow by off-loading this patient population from the Emergency Department
- Increased efficiency by providing care delivery in a less costly environment
