

# Physician On-Call Tracking & Hand-Over Tool

**Physician Lead:** *Dr. Daryl Wile*

## Goals

To create a simple patient tracking and handover tool to help teams of physicians hand over issues and problems to another provider who is assuming responsibility.

## Outcomes

- Create a tool to replace the ubiquitous index cards that are used to track physician activities while on call.
- Improve communication between physician teams about handover issues.
- Reduce the administrative burden on physicians to increase the amount of time they are able to care for patients.

**Budget approved: \$2,500**
