

Explore Why Patients with Influenza-Like Illness Are Not Placed on Infection Control Precautions

Physician Lead: *Dr. Amanda Wilmer*

Goals

- Hold a multi-disciplinary meeting with key groups that admin or consult on patients with viral respiratory illness to determine why these patients are not being placed on appropriate infection control precautions at initial presentation.
- Utilize information gathered to prepare a proposal for a QI project to improve compliance.

Outcomes

- Improved compliance with infection control precautions will benefit patients, physicians and staff at KGH as it prevents spread of infections and their associated harm.

Budget approved: \$2,817
