

Facilitation Simulation Course Development

Physician Lead: *Dr. Jared Baylis*

Goals

- To develop a Facilitation Simulator course that will bring facilitators within IH to a basic competency in simulation facilitation.
- To allow reflective practice, guidance and feedback on debriefing skills.

Outcomes

- A standard facilitation approach can have a significant effect on the education of clinicians, and as a result, influence both quality patient care and patient safety.

Budget approved: \$6,073
