

ATTENTION:

New Information Sharing Agreement in CACTUS

Helps You to Get Connected with Facility Engagement

Why This Matters To You:

IHA has confirmed that information sharing agreements are to be added to the next release in Cactus which will occur in January 2020. This important change will enable your MSA to better communicate with **you** – and all its members.

The change that you will see is that the IHA Medical Administrative Assistants will now be able to pull contact lists of all physicians that have agreed to the sharing agreement from Cactus and share these with the Medical Staff Associations/Physician Societies across IHA acute care facilities.

It's important to note the only information to be shared - "**Name**" and "**Preferred Email**" will be shared solely at a local level with your MSA and/or Physician Society leaders and support staff.

It is a significantly positive shift that will allow your MSA and Physician Society leaders and support staff to know who all of the members are and how to connect directly with them about local activities, events, opportunities, and initiatives.

Your Only Action Needed:

As only physicians who agree to the sharing agreement in the Cactus release will be included in these contact lists, please be sure to make this selection. You can also help us to get the word out ahead of the next Cactus release about this change by speaking with your physician colleagues.

	<input type="checkbox"/>	I DO consent to the sharing of my contact information (as described above) with the Doctors of BC, Facility Engagement Initiative, OR
	<input type="checkbox"/>	I DO NOT consent to the sharing of my contact information (as described above) with the Doctors of BC, Facility Engagement Initiative.
	<input type="checkbox"/>	I REVOKE my consent that was previously given for the sharing of my contact information with the Doctors of BC, Facility Engagement Initiative.
