

# Developing a Consensus Approach: Work-up of the Axilla in Early Breast Cancer

Physician Lead: *Dr. Sita Ollek*

## Goals

- Undertake a multi-disciplinary approach to review individualized treatment based on patient, clinical and pathologic factors.
- Address questions pertaining to work-up of the axilla and determine a pathway and consensus regarding which patients may benefit from more aggressive therapy.

## Outcomes

- Foster collaboration between the multiple specialists who treat breast cancer.
- Patients will derive greater benefit from a consensus approach and will therefore receive timely care.

**Budget approved: \$6,835**
