

Establishment of a Multidisciplinary Endoscopic Skull Base Surgery Program

Physician Lead: *Dr. David Omahen*

Goals

- Explore the feasibility of introducing endoscopic skull base techniques to KGH.
- Begin with endonasal transsphenoidal approaches to the sella, and progressing to expanded skull base approaches.
- Streamline and standardize multidisciplinary clinical evaluation and treatment processes.

Outcomes

- Patients will benefit from streamlined access to improved operative techniques, multidisciplinary review and radiosurgery.
- Enhanced physician collaboration and communication.

Budget approved: \$6,000
