

Feasibility of Trigeminal Neuralgia Radiosurgery

Physician Lead: *Dr. Benjamin Mou*

Goals

- Expand the collaboration between radiosurgery and radiation oncology to provide modern, advanced treatment options for patients with TN in Kelowna.
- Explore the feasibility of introducing functional radiosurgery using existing infrastructure.

Outcomes

- Establishment of a multidisciplinary referral pathway and treatment protocol.
- Support outreach activities to referring family physicians and neurologists.
- Patients will benefit from streamlined access to operative procedures and radiosurgery.

Budget approved: \$10,000
