

Gastroenterology and Emergency Medicine Workshop for Optimizing Outpatient GI Clinical Care Pathways

Physician Lead: *Dr. Carla Nash*

Goals

- Develop a coordinated approach to management of GI Patients which may lead to better clinical care, improved communication, reduction in patient symptomatology, and reduction in return ED visits.

Outcomes:

- By engaging with only the resources most appropriate for the patient's circumstances, these clinical care pathways reduce unnecessary ED visits, consultations with other healthcare providers, and diagnostic testing

Budget approved:
