

Developing Laboratory Pathways for Neurology

Physician Lead: *Dr. Amanda Wilmer*

Goals

- Create a laboratory ordering pathway for meningoenephalitis to ensure appropriate infectious diseases testing is performed based on clinical presentation and risk factor
- Evaluation of developed ordering pathway by medical microbiology and neurology groups.

Outcomes

- Approved pathway will be disseminated widely, and included as part of roll out of a new meningoenephalitis panel by Laboratory Department to be released later in 2023..

Budget approved: \$5,986.75

June 2023
