

# Implementing PIEB for Labour Analgesia

**Physician Lead:** *Dr. Arthur Wong*

## Goal

- Update and modernize the existing delivery of labour epidurals by implementing “Programmed Intermittent Epidural Bolus” (PIEB) at KGH as practiced in other academic sites and obstetrics departments in Canada.

## Outcomes

- Improve patient-centered care;
- Decreased motor block and improved pain control to improve maternal experience during labour.

**Budget approved: \$3,523.60**

**June 2024**
