

Management of Febrile Infants

Physician Lead: *Dr. Ruan Vosloo*

Goal

- Access PCT testing at KGH and standardize the risk stratification to identify infants under 90 days who are at the highest risk; and
- Endorse the use of PECARN in order to limit the variations in practice and improve quality of service.

Outcomes

- Limiting variations in practice;
- Decrease overall costs related to caring of vulnerable group;
- Ultimately improve quality of service.

Budget approved: \$5,341.86
